## A Lomilomi intensive

An intensive training in Hawaiian Lomilomi, Ho'opono and German aromatherapie. The perfect introduction to a healing modality and world view rapidly shaping the culture of healers and bodywork practitioners everywhere.

**Julie Kai Stowell** has been involved in the health profession since 1986. Her global travels, wilderness training, native studies and exposure to the many indigenous cultures and peoples gives her a unique perspective and approach. Julie Kai uses various healing modalities including but not limited to Quantum Energetics and Lomilomi in which she was trained and apprenticed with Kumu Aunty Margaret Machado of Napoopoo, Hawaii. She advocates organic farming, backyard permaculture, good food and healthy cooking practices all aimed at providing resilience and sustainability for a healthier body.

**M. Kalani Souza** is a gifted storyteller, singer, songwriter, musician, performer, poet, philosopher, priest, political satirist, and peacemaker. A Hawaiian Practitioner and Cross-Cultural Facilitator, he has experience in promoting social justice through conflict resolution. His workshops and lectures inspire, challenge and entertain the listener while calling all to be their greater self. His native roots allow him a unique perspective of the collision of two worlds; one steeped in traditional culture while the other a juggernaut of new morality. He is a messenger of integration and collaboration in a world normally rife with exclusion, oppression and hopelessness.

**Susanne Fischer-Rizzi** is interested in healing plants since her early childhood. During an Ayurveda education in India 1972 she came in contact with healing massage for the first time. She has learnt different massage techniques with teachers from different cultures and schools. She is the founder of aromatherapie in Germany and has published a book of aroma-massage 1993. In her school ARVEN she is teaching aroma-massage since 20 years. In this seminar she will lecture "scent, brain function and body".
